

A3

14. (As amended) A food comprising the preventative or remedy according to claim 1.
15. (As amended) An animal feed comprising the preventative or remedy according to claim

1.

A4

23. (As amended) The vaccine adjuvant according to claim 19, wherein the ion exchange resin is a gel form resin.
24. (As amended) The vaccine adjuvant according to claim 19, wherein ion exchange chromatographic separation is carried out in a pseudo moving-bed continuous separation method.
25. (As amended) The vaccine adjuvant according to claim 19, wherein the fraction absorbing light of a wave length of 420nm is further treated by electrodialysis to thereby decrease amounts of salts.

A5

29. (As amended) A food comprising the vaccine adjuvant according to claim 16.
30. (As amended) An animal feed comprising the vaccine adjuvant according to claim 16.

A6

38. (As amended) The anti-endotoxin agent according to claim 34, wherein the ion exchange resin is a gel form resin.
39. (As amended) The anti-endotoxin agent according to claim 34, wherein ion exchange chromatographic treatment is carried out in a pseudo moving-bed continuous separation method.
40. (As amended) The anti-endotoxin agent according to claim 34, wherein the fraction absorbing light of a wave length of 420nm is further treated by electrodialysis to thereby decrease amounts of salts.

A7

44. (As amended) A food comprising the anti-endotoxin agent according to claim 31.
45. (As amended) An animal feed comprising the anti-endotoxin agent according to claim 31.
